

EDGE VS420T â?? 2020 â?? 1,200 Hours

Description

The **EDGE VS420T** is a heavy-duty tracked twin-shaft slow-speed shredder designed for demanding waste processing and recycling applications. Built to handle mixed waste, bulky materials, wood waste, and other recyclable materials, this machine combines high-torque shredding performance with excellent on-site mobility and efficient material discharge.

This **2020** machine has only **1,200 hours** and is powered by a **Stage V compliant CAT diesel engine**. Previously used for processing mixed waste, it has been parked for approximately one year and is reported to be in good running condition. The machine features a fire suppression system, central lubrication with a Lincoln pump, and a cleated discharge conveyor. Engine filters were changed at 979 hours on 19 November 2025. The bodywork has been wrapped, with some cosmetic wear, and a pallet of spare shredding teeth and tooling is included. Located in Dundee, UK.

Key Specifications

â?? **Model:** EDGE VS420T
â?? **Year:** 2020
â?? **Hours:** 1,200
â?? **Machine Type:** Tracked twin-shaft slow-speed shredder
â?? **Engine:** CAT Diesel
â?? **Emissions Standard:** Stage V compliant
â?? **Lubrication System:** Central lubrication with Lincoln pump
â?? **Discharge Conveyor:** Cleated conveyor belt
â?? **Condition:** Good running condition, fair cosmetic appearance

Key Features

â?? Heavy-duty twin-shaft slow-speed shredding system for demanding recycling applications

â?? Tracked configuration for excellent mobility around recycling and waste processing sites

OVS Recycling Ltd | Company Number: 15921502 | Registered Office: 7 Bell Yard, London , England, WC2A 2JR | www.ovsrecycling.co.uk

?? Stage V compliant CAT diesel engine

â?? Fire suppression system fitted for additional operational safety

â?? Central lubrication system with Lincoln pump for convenient maintenance

â?? Cleated discharge conveyor for efficient material handling

â?? Engine filters changed at 979 hours on 19 November 2025

â?? Pallet of spare shredding teeth and tooling included

â?? Previously operated on mixed waste applications

â?? Low operating hours for its age, with approximately 1,200 hours recorded

â?? Reported to be in good running condition despite being parked for approximately one year
