

Peterson 2710D â?? 2020 â?? 4,000 Hours

Description

The **Peterson 2710D** is a high-production tracked horizontal grinder designed for demanding wood waste, biomass, and recycling applications. With strong performance on dry feedstock such as pallets, sticks, and wood, it offers the mobility and processing capacity required for professional recycling and biomass operations.

This **2020** machine has approximately **4,000 frame hours**, with a major advantage: the **CAT engine has been professionally rebuilt by CAT and has only around 200 hours since the rebuild**. The work included a new cylinder head, EGR, oil cooler, water pump, and injectors. The engine was returned to CAT for bench testing and was fully cleared and signed off. Complete receipts for the rebuild are available. The wear plates and baskets have also been attended to, and the rotor has been balanced. The machine runs very well and is ready for work.

Key Specifications

â?? **Model:** Peterson 2710D
â?? **Year:** 2020
â?? **Frame Hours:** Approximately 4,000
â?? **Engine:** CAT Diesel â?? professionally rebuilt by CAT
â?? **Engine Hours Since Rebuild:** Approximately 200
â?? **Machine Type:** Tracked horizontal grinder
â?? **Condition:** Ready for work

Key Features

â?? CAT engine professionally rebuilt with full documentation and receipts available
â?? Approximately 200 hours on the engine since rebuild
â?? New cylinder head, EGR, oil cooler, water pump, and injectors
â?? Engine bench-tested by CAT, cleared and signed off
â?? Wear plates and baskets attended to
â?? Rotor professionally balanced

OVS Recycling Ltd | Company Number: 15921502 | Registered Office: 7 Bell Yard, London , England, WC2A 2JR | www.ovsrecycling.co.uk

?? Excellent performance on dry feedstock including pallets, sticks, and wood
?? Tracked configuration for excellent mobility around the site
a?? Fully operational and ready for immediate use
