

Hammel VB 750 Electric â?? 2002 â?? 1,682 Hours

Description

The **Hammel VB 750 Electric** is a heavy-duty twin-shaft slow-speed shredder designed for demanding wood waste processing and recycling applications. Powered by an electric drive system, this machine offers high-torque shredding performance and is suitable for recycling facilities, wood processing operations, and industrial waste management sites.

This **2002** machine has **1,682 recorded hours** and is reported to be in good working condition, with no known mechanical issues. It is equipped with wood shredding shafts that have been hardfaced to improve wear resistance. The conveyor motor has been replaced, and the hydraulic filter has recently been changed. Located in the UK, this electric shredder offers a cost-effective solution for wood waste processing.

Key Specifications

â?? **Model:** Hammel VB 750 Electric
â?? **Year:** 2002
â?? **Hours:** 1,682
â?? **Machine Type:** Twin-shaft slow-speed shredder
â?? **Drive System:** Electric
â?? **Shaft Configuration:** Wood shredding shafts
â?? **Condition:** Reported in good working order

Key Features

â?? Heavy-duty twin-shaft shredding system for wood waste processing

â?? Electric drive system suitable for recycling and industrial applications

â?? Wood shredding shafts with hardfacing for improved wear resistance

â?? Conveyor motor replaced

OVS Recycling Ltd | Company Number: 15921502 | Registered Office: 7 Bell Yard, London , England, WC2A 2JR | www.ovsrecycling.co.uk

.?? Hydraulic filter recently changed

â??? Low recorded operating hours for its year

â?? Reported to be fully operational with no known mechanical issues

â?? Suitable for wood waste recycling and material size reduction

ð??• **Location:** UK
