

Terex TDS 820 â?? 2017 â?? 6,000 Hours

Description

The **Terex TDS 820** is a robust slow-speed shredder built for demanding recycling and wood waste processing applications. Designed to deliver reliable performance with low operating costs, this machine is particularly effective on mixed wood while also handling a variety of bulky waste materials.

This **2017** machine has **6,000 hours** and has been owned by the same operator for the past **six years**, reflecting consistent maintenance and careful use. Powered by a reliable **Scania engine** without AdBlue, it offers simple operation and reduced running costs. Equipped with a radio remote control and a recently fitted new conveyor belt, the machine is in good working order and ready for immediate use.
