

Lindner Urraco U75D 2012 9800 hours

Description

The **Lindner Urraco U75D** is a heavy-duty twin shaft slow speed shredder designed for demanding recycling applications. Ideal for processing wood waste, green waste, construction & demolition waste, and commercial waste, this machine delivers high torque, reliable performance, and exceptional versatility for professional recycling operations.

This **2012** machine has **9,800 hours** and was **fully refurbished in 2024** to a high standard. Major components, including the gearbox, hydraulic motors, and pumps, have been completely renewed and have approximately **400 hours** of use since refurbishment. The discharge conveyor has also been rebuilt, making this a machine that is ready for demanding work. Located in Germany.
