

Peterson 2710D for sale

Description

The **Peterson 2710D** is a high-production horizontal grinder engineered for demanding wood and green waste processing applications. Designed for maximum throughput and consistent material sizing, this machine is ideal for biomass producers, composting facilities, and recycling operations requiring reliable and efficient grinding performance.

This **2018** machine has **8,600 hours** and has been operated on **green waste only**. It is well maintained and ready for work, featuring a tracked chassis for full site mobility, a high-capacity infeed system, and a quick-change screen system for flexible output sizing. New drag chains have recently been fitted, and the machine is supplied with additional wear and spare parts. Located in Scotland, UK.

Key Specifications

â?? **Model:** Peterson 2710D
â?? **Year:** 2018
â?? **Hours:** 8,600
â?? **Machine type:** Tracked horizontal grinder
â?? **Application:** Green waste and biomass processing
â?? **Condition:** Well maintained and ready for work

Key Features

â?? High-production horizontal grinder for demanding recycling applications
â?? Operated on green waste only
â?? Fully tracked machine for excellent mobility on site
â?? High-capacity infeed system for fast and consistent throughput
â?? Quick-change screen system for adjustable output size
â?? New drag chains recently fitted
â?? Includes wear parts and spare parts
â?? Ready for immediate operation with no additional investment required

ð??• **Location:** Scotland, UK
