

Powerscreen Metro Trak 2021 4000 hours

Description

The **Powerscreen Metrotrak** is a compact and efficient jaw crusher, designed for high performance in recycling, construction, and demolition applications. Ideal for C&D waste, concrete, and general recycling operations, this machine offers excellent mobility and ease of transport, making it perfect for both urban and on-site crushing projects.

This 2021 unit has approximately 4,000 hours and is currently undergoing refurbishment. The machine will be fully prepared and ready for work in the next 2-3 weeks, offering a great opportunity to secure a high-demand crusher before it becomes available on the open market. Located in the UK.
